

202 Passive Signal Multipliers User Manual

05-2026 Rev. 1

1 Introduction

The *202 Passive Signal Multipliers* are 2 simple utility passive multiples in *Intellijel* 1U format. Each multiple produces four copies of the input signal, and the input of the second multiple is normalled to the first input, so the module can be used as a single multiple that produces eight copies of the input signal.

2 Installation & Power

This module requires 14hp of free space in an *Intellijel* 1U row of the rack. This module is completely passive, meaning that it does not require power to work. Therefore, just mount the module to the rack and it will be in working state.

3 Front Panel Overview

4 Technical Specifications

4.1 Dimensions & Power

Width	Height	Depth	+12v Current	-12v Current
<i>14hp</i>	<i>1U Intellijel</i>	<i>~15mm</i>	<i>0 mA</i>	

4.2 Inputs & Outputs

Inputs		Outputs	
IN 1, 2	<i>Any modular levels</i>	OUT 1.1-4, 2.1-4	<i>Any modular levels</i>
